

Ex 8 Hot stuff

- In the space below draw a **relational (Venn) diagram** with areas representing
 - **all materials** (labelling it **M**),
 - materials that are **being heated (H)**, and
 - materials **not being heated (NH)**.

- On your diagram *using coloured pens* mark in areas for
 - materials whose **temperature is rising** (labelling it **R**), and
 - materials whose **temperature is constant** (labelling it **K**).

- In each separate area in your diagram write letters **A, B, C**, etc.
In the table below for each area give a specific **example** of a material.

	Example
A	
B	
C
